

Treating Veterans with Mild Traumatic Brain Injury

May 14, 2021, 10:00 AM – 12:00 PM

Join Zoom Meeting: <https://ucdenver.zoom.us/j/95800249677>

Treating veterans with mild Traumatic Brain Injury (mTBI) requires an understanding of military culture and the ways mTBI sustained by service members in a military setting are unique. Tina Fanello, MA, LCSW, CBIS and Catharine H. Johnston-Brooks, PhD, ABPP-CN from the Marcus Institute for Brain Health, University of Colorado Anschutz Medical Campus will provide training on how to best serve members of the Veteran population with mTBI.

Learning Objectives

- Identify 1) important elements of military culture that directly affect how military veterans respond to treatment of mTBI and PTSD and 2) resources that can support continued development of military cultural competence.
- Describe effective skills and strategies that help build trust with military veterans presenting for treatment of mTBI and PTSD in a rehabilitation setting.
- Understand what factors contribute to the unique presentation of mTBI in Veteran populations.

Speakers

- Catharine H. Johnston-Brooks, PhD, ABPP-CN
Marcus Institute for Brain Health, University of Colorado Anschutz Medical Campus
Departments of PM&R and Neurology
- Tina Fanello, MA, LCSW, CBIS
